UNBEATABLE!

FOR YOUR HOUSE PLANTS AND GARDEN FLOWERS

FULTON'S PLANTABBS
Odorless Plant Food Tablets
Containing Vitamin B₁

Fulton's Plantabbs are highly concentrated, completely balanced plant food containing vitamin B₁ in tablet form.

This miracle-working combination is equally effective for feeding freshly potted plants, house plants that are not thriving satisfactorily, garden flowers, roses, cuttings, seedlings and for preventing shock and injury when transplanting.

Have gorgeous ferns that neither wither nor turn brown at tips, grow house plants covered with blossoms all winter long. Rejuvenate sickly house plants—almost overnight—keeping them healthy despite artificial heat and lack of sunshine.

Fulton's Plantabbs should not be confused with other preparations and offerings that merely supply

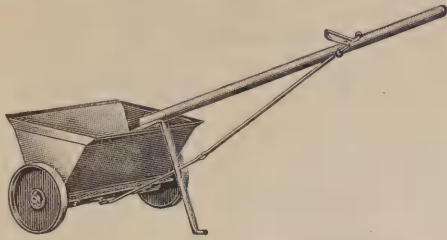

Vitamin B₁ (whether in tablet, powder or liquid form). Vitamin B₁, itself is not a fertilizer and does not take the place of or do the work of a fertilizer. Plantabbs however, are unique in that they are a complete balanced plant food and also contain root stimulating Vitamin B₁.

No odor, no mess. Always fresh, ready for use—we recommend them.
